

## real-time communications: key to stay competitive

Minimizing operational costs, complying with mandated quality parameters, ensuring efficient workflow, effective planning, quick response to changing business scenarios and real-time communication with partners (customers/ vendors) are crucial for auto ancillaries to stay competitive.

With global opportunities knocking at their doors, the auto ancillary manufacturers need to have world-class information systems to capture these opportunities.

### auto ancillary: business needs

**Real time information** on production, dispatches, rejections, receivables, payables and inventory.

**Just-in-Time mode of working** - adherence to stringent time and quality standards.

**Multiple product line** - Inventory management location-wise, material availability (wip, job work).

**Suppliers to multiple OEMs** - integration and compliance issues with them.

**Effective planning and execution** production and capacity planning, production scheduling and material requirement planning.

**Real - time updates on multiple plants** - integrated and centralized operations and management.

**Vendor Management** in terms of share of business, delivery/quality ratings.

### from real-time information to vendor management: **all under single crown**

**NAVAuto**, the auto-ancillaries industry vertical solution built on the Microsoft Dynamics NAV has been helping leading manufacturers achieve these objectives:

**Streamlining Operations:** Adaptable to JIT mode of working or any other like KANBAN, ILVS

**Streamlining Engineering:** Key tasks like designing new product and getting them to market quickly can be possible by extending enterprise collaboration, integrating workflow as per the working across the organization

**Efficient Supply Chain:** Enhanced visibility into customer demands, proper coordination with suppliers, enable electronic Kanban throughout the supply chain, real-time information on item changes that effect production

**Faster Response to Demand:** Accurate forecasting and planning helps production and scheduling

# Microsoft Dynamics NAVAuto OFFERINGS

- Managing scattered and huge transactional volumes

## Alletec NAVAuto Customers:

## All e Technologies (Alletec): Your Partner to Success

Alletec (All e Technologies) has dominated the Dynamics NAV (formerly, Navision) business solution space in India for last 10 years. From being the first NAV (formerly Navision) partner in India, Alletec has consistently maintained its first-mover advantage and retained its leadership position. Majority of the large NAV customers in India have relied on Alletec for implementation and support services. Alletec has also been consistently active in servicing and supporting NAV customers and partners outside India. Years of sharp focus on Dynamics NAV (formerly, Navision), a series of high profile, complex and large implementations spanning across all continents, and the sheer depth of product knowledge, functional expertise and technical competence of our teams have earned us admiration and respect from customers and competitors alike.

Alletec is today India's largest provider of NAV solutions - by both team size, number of customers and NAV revenue.
