

managing risk: key to efficiency gain

In today's rapidly changing and increasingly complex marketplace, small & medium size construction companies often find themselves responding to the latest crisis and barely keeping up with the growth, sometimes at the expense of healthy profits. This industry offers opportunities abound, but capitalizing on them, has never been more challenging.

Unfortunately, many construction companies struggle with nonintegrated, multiple-vendor legacy systems that provide untimely, inaccurate information and make it difficult to adapt to changing business requirements.

These companies looking to improve their bottom line can benefit from implementing integrated software systems that support key business processes, with the flexibility to adapt to changing business requirements.

The right **financial** and **operational** software translates into a clear competitive advantage that reveals itself not only in the project bidding and execution phases but more importantly, in the company's bottom line.

Moreover, **unambiguous relationships**, **clear communication** and **streamlined processes** are necessary among materials and equipment suppliers, vendors, subcontractors, to complete the projects on time and within budgetary constraints.

NAVConstruct meets your operational requirements by providing functionality for:

- **Project Management**
- **Purchase & Vendor Management**
- **Contracts Management**
- **Client Billing**
- **Stores & Site Management**
- **Financial Management**
- **Fixed Asset Management**
- **Business Development**
- **Workflow Based Approvals**
- **Document Management**

Alletec's NAVConstruct Enhancements over standard NAV Solution

All e Technologies (Alletec): Your Partner to Success

Alletec (All e Technologies) has dominated the Dynamics NAV (formerly, Navision) business solution space in India for last 10 years. From being the first NAV (formerly Navision) partner in India, Alletec has consistently maintained its first-mover advantage and retained its leadership position. Majority of the large NAV customers in India have relied on Alletec for implementation and support services. Alletec has also been consistently active in servicing and supporting NAV customers and partners outside India.

Years of sharp focus on Dynamics NAV (formerly, Navision), a series of high profile, complex and large implementations spanning across all continents, and the sheer depth of product knowledge, functional expertise and technical competence of our teams have earned us admiration and respect from customers and competitors alike.

Alletec is today India's largest provider of NAV solutions - by both team size, number of customers and NAV revenue.
