

ROVE

Business – On the *Move*

WHEREVER, WHATEVER

Follow Your Business On the Move

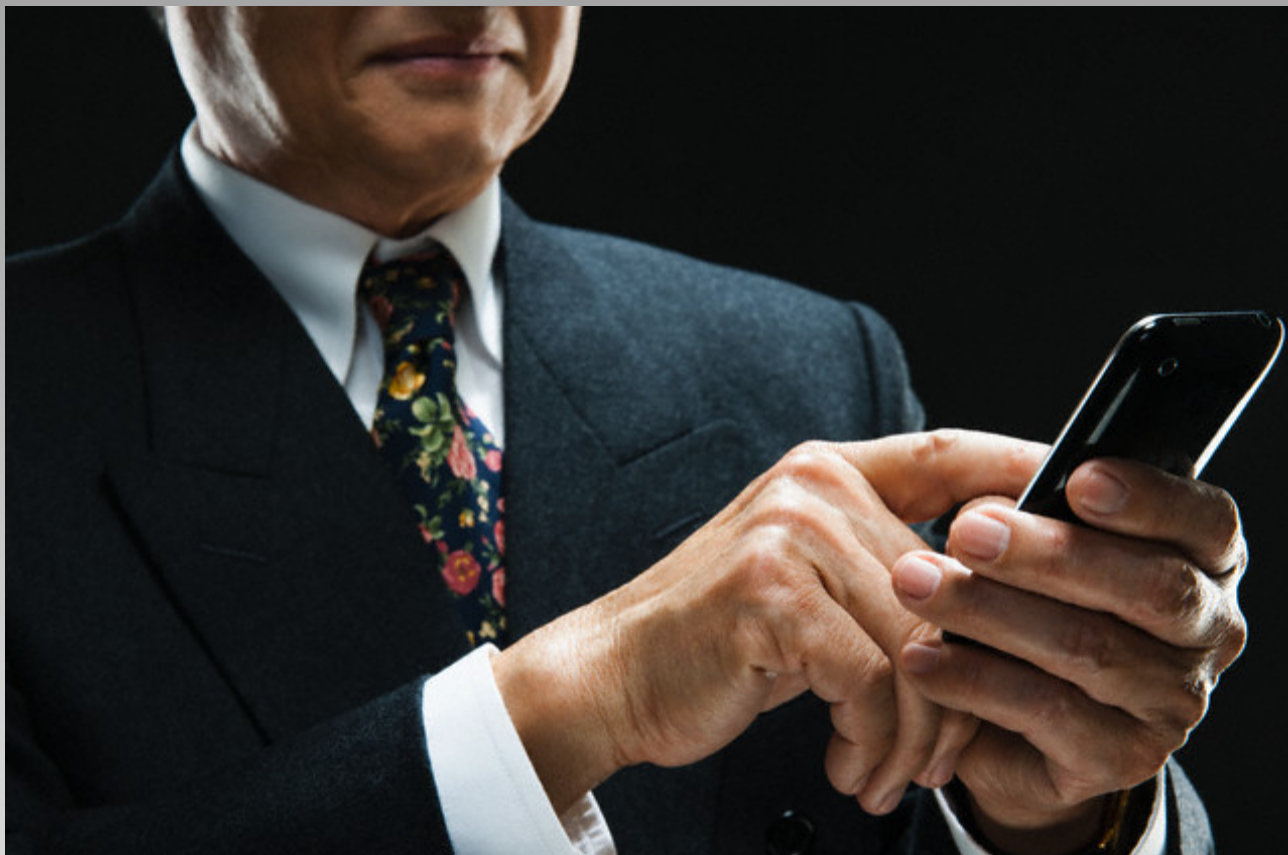

Most companies today are considering business intelligence tools to improve company's productivity and bottom-line. But in reality; the application restricts you to your desk, with too much reliance on immobile resources and remote data sources. BI is no longer used just for doing strategic and tactical reporting and analysis, but also for driving and optimizing daily business processes and workflows.

Now you have a choice, to control every pulse of your business round the clock anywhere, anytime. **ROVE**, by Alletec a revolutionary, mobile dashboard provides you rapid access to your existing enterprise information without being burdened of a phone call or a laptop. It puts you in the driver's seat, quickly enabling you to view your accounts, reports and transitions, the *Drill Down* capability means; you never have to sacrifice important information to keep things organized.

How *ROVE* allows you easy access to actionable information.

- Make decisions faster; be in control of your business, with on-the-go availability of day-to-day business information.
- Data interpretation and comparison made easier
- In depth access to business operations like Sales, cash in-out financials, and other important information
- Information availability in disconnected scenario
- Provides real-time access to up-to-date information
- Scalability to any number of reports. Control access rights from backend.
- No dedicated handset or laptop required
- Add layers of meaning to data by a click on your phone
- All standard business reports (like Balance Sheet, Profit & Loss Account) available to you

ROVE helps companies improve business performance by effectively and efficiently extending your existing enterprise solutions.

ROVE and partner enterprise deliver mobile BI solutions designed to work together—so not only can you help your mobile employees by providing familiar applications while on the go, but you can capitalize on your present investments in hardware, software, and training.

Below are the core features and services that make up **ROVE** mobile dashboard.

List of different Dashboards available to Users

Drill-down analysis of Cash Position – Level 1 shows total Inflow, Total Outflow and net position

Inventory Valuation– Breakup of Finished Goods, Raw material and WIP

Review trends to improve decision making

Aging Dashboard, provides in-depth analysis of customer, vendors and items

Why ROVE?

Monitor, Understand, Drive—In Real Time

ROVE, provides an adaptable, cost-effective, easy platform for deploying and running a wide choice of mobile business intelligence solutions that helps your executives be in sync with business information, real-time while on the move. By using industry-standard software and devices with support for Web standards, Rove works well with your existing enterprise solutions and line-of-business applications developed by our partners. These capabilities, combined with technological innovation, security focus, and industry alliances, help you meet the needs of your enterprise today and enhances your ability to take quicker decisions.
