

"Alletec helps DreamTrips implement D365 Finance and Supply Chain to effortlessly manage their accounting, trips, procurements, and sales"

## Overview

**HQ-** Texas, United States

**Industry-** Travel

### Customer Profile

DreamTrips International offers the world's best, and most awarded group vacation lifestyle membership. They offer international trips, flight bookings, hotel bookings, car rentals, and different activities on trips. DreamTrips has wings spread across 5 countries.

## Executive Summary

DreamTrips has been using Microsoft Dynamics AX 2012 as an ERP solution for their business to automate and streamline financial, business intelligence, and supply chain processes.

However, they were using Microsoft Dynamics AX 2012 as a manual accounting system.

DreamTrips with workplaces at multiple locations across the world, needed a solution that allows them to handle their accounts, trips, procurements, and sales from a unified platform.

When DreamTrip engaged with Alletec, they received an all-in-one solution to manage and access their data stored in multiple disjoint systems.

## The Situation

- The existing application – Microsoft Dynamics AX 2012 was supporting accounting for 60 entities across 20 countries for DreamTrips.
- Microsoft Dynamics AX 2012 worked as just a manual accounting system for the company.
- Data from 10+ external systems manually brought into Microsoft Dynamics AX 2012.

## Alletec Solution

- Suggested and implemented D365 Finance and Supply Chain to manage accounting, trips, procurements, and sales.
- Used Power BI to create a customized reporting system to make informed business decisions.
- Used Power Automate and custom API for seamless integrations with their web app.

## The Benefits

- Dream Trips developed efficiency in the Finance department as most of their tasks are now automated. A much lower headcount is able to manage the operations.
- A clean start to Microsoft Dynamics 365 FSCM enabled adopting the most advanced features and doing away with heavy customizations.
