~ 3 months

NIIF or National Investment & Infrastructure Fund is a collaborative investment platform for international and Indian investors anchored by Government.

They invest across Infrastructure & Growth Equity and collaborate with Government and Private stakeholders on critical

Business Benefits

Processing time of Business Central is faster than Navision and it offers a more user friendly interface to navigate where users are able to personalize the Interface as per their requirement. It also offers mobile access allowing employees to work on the go.

Meeting MCA compliance with Dynamics 365 Business Central has enabled align with the specific regulatory requirements of the local Indian market.

Seamless Data verse integration with CRM and Business Central, adapting the platform to their specific workflow needs.

Business Central is cloud based and receives regular updates ensures accounting system to stay complaint with changing regulations. Also, with this we able to move from our existing on-premise infrastructure to completely cloud based.

Business central is feature rich solution offering seamless integration with other MS tools and applications – we use Vendor portal where vendors submit their invoices online, Power apps ERP for procurement and approvals management, Power BI for reporting and business central integrates with each of them seamlessly for accounting.
