

Get AI Ready with a Unified Data Foundation

THE CURRENT STATE OF DATA IN ENTERPRISES

Data is the lifeblood of modern enterprises, yet many organizations struggle to harness its full potential due to fragmented data estates.

of all enterprise data goes unused for analytics¹

of leaders say organizational data is somewhat or completely siloed²

of IT leaders believe that unifying the data lifecycle on a single platform is critical for analytics and AI³

THE IMPACT OF A FRAGMENTED DATA SYSTEM

12hrs
PER WEEK

Time spent by employees trying to access data across disconnected systems⁴

Data sprawl and duplication

Multiple copies of data increase cost and risk.

Limited interoperability

Disconnected systems slow down insights.

Security and compliance gaps

Inconsistent controls raise exposure risks.

Vendor sprawl

Too many tools mean too little visibility.

Slow time to insight

Teams spend more time fixing pipelines than finding insights.

THE DISCONNECT BETWEEN AI GOALS AND DATA READINESS

\$252 Billion

Corporate AI investment in 2024⁵

More than 80%

AI Projects fail⁶

Only 13%

companies globally are ready to leverage AI to their full potential⁷

70%

of AI project failures are attributed to data issues⁸

Only 40%

of organizations can integrate data from multiple sources to build a robust data set for training an AI model¹⁰

Data leaders are racing to bring AI to their organizations, but very few are truly ready to unlock its potential due to:

Poor data quality and missing governance

Fragmented or inaccessible data

Bias in training data leading to unreliable outcomes

Legacy architectures

THE NON-NEGOTIABLE: A FUTURE-READY DATA PLATFORM

of leaders say stronger data infrastructure would accelerate AI adoption⁹

of organizations don't have or are uncertain about having a trusted data foundation in place for analytics¹⁰

A unified, governed, and high-quality data platform ensures your AI outputs are accurate, scalable and secure, while reducing complexity and unlocking faster time to value.

Unified

Access accurate, reliable information from a single source.

Collaborative

Empower AI to generate more informed insights.

Governed

Protect data integrity and security for a safer and more secure AI.

Scalable

Handle increasing data volumes and complexity with ease.

MICROSOFT FABRIC

All Your Data Needs. One Platform.

379% ROI OVER THREE YEARS¹¹

Microsoft Fabric is an AI-powered platform that unifies all the data workloads in a single environment called OneLake to foster collaboration, democratize data and power real-time business insights.

PARTNER WITH ALLETEC TO ACCELERATE AI SUCCESS

Alletec blends deep Microsoft solutions expertise with industry knowledge and 25+ years of experience to catalyse digital transformation and amplify business outcomes for enterprises. As an early implementation partner for Microsoft Fabric, we enable organizations to unify data, strengthen governance, and accelerate AI-driven outcomes.

To get a personalized data audit
